## 2- MAN **DEADLY DUCK BLIND** New Design for Fall 2007

**Location, location, Location.... Deadly Duck gets you there!**

**Ultimate hide \* Portable \* Quick Assembly \* Ease of shooting \* Fools late season birds**

**Quick assemble panels allow or transport to the HOT SPOT daily.**

Add quick connect pins, chairs and natural materials for camouflage and get ready for the birds. The EZ-FAB mesh, with added natural materials, allows your appearance to truly disappear. Sitting in comfortable chairs allows shooting ease of more accurate shots. Easy to rise and shoulder gun from sitting and keep on the bird. Lightweight at 35 pounds with the EZ-FAB Mesh attached. Includes all hardware.

**Aero has totally re-designed their blind.**

- Lighter weight square tubing matched to the 2 man design.
- Compact design for shipping. Improved design for hunting ease. Large panels break down to allow for package shipping.
- New modular design. Just add additional blinds to increase hunters.
- New structural supports for end panels allow the elimination of one strut so multiple blinds can be connected. Hunters then can pass through. Optional bolts for permanent set up.
- Metal coated with durable textured powder coat in dead grass color to blend into any setting.
- Durable construction for many years of service. Great for weekend hunter or club blinds.
- New EZ-FAB Mesh pattern allows for easier insertion of natural materials. New flat finish poly.
- Designed for hunter success... to allow the hunter to sit in comfort and stand to shoot.

### **Why Deadly Duck Works**

- Easy to transport, or move daily. Just moving as little as 75 feet will fool wary late birds.
- Eliminates the boxy look and allows some light penetration. Appears like natural occurring vegetation and offers one way vision. Other blinds are too square and give off unnatural shadows. Superior to flat camouflage materials or hard to see through mats, which educated birds recognize.
- End door allows for quick access for hunters and dog to retrieve.
- 3-way Trap Door. Leave open and brush up for early season, or flip out or slow drop in to not alert the ducks of hunters slowly coming up to shoot. Quiet latch to not flare the birds.
- Plus trap door allows for a little more time to get the shot off without flaring the birds.
- Watch the birds work and know when to call the shot.
- Great for young to the old. Ample room for hunters, dogs & gear.
- Shooting at closer ranges produce greater accuracy and more discriminating shots. You can identify the specie and gender of the ducks at closer ranges.
- Panels stack for transport or storage.

**Two, 2 Man blinds together**

**SEE and not be SEEN. Know when to call the shot!**

Paul Sullivan says "The Deadly Duck makes Paul's Ponds successful, even late season." [www.burbankgoose.com](http://www.burbankgoose.com)
