509-545-8000 [www.AeroOutdoors.com](http://www.AeroOutdoors.com) Note: Pictures of the colors may vary from actual, due to photograph and monitors resolution.

**Be creative!** Use for crafts, fishing rods, décor or industry. Nylon fibers are abrasion resistant and do not bleed when wet. Pair with **Aero Ure-Glue** for long-lasting results. **Enhances realism in decoys;** Flocking emulates real feathers and had similar UV properties. White paint under UV light turns black, which flock while hold its color. All © Copyrights and ™ exclusively reserved by Aero. Fiber cut is .30 to .45. Most are .40" or 3 denier (3dtrec). Custom colors for fee.

**Use Aero Ure-Glue** for a quality long-lasting finish. One coat is sufficient in most cases. Can re-apply another coat on top, when needed. Use a matching color or slightly contrasting color to add depth/realism. Urethane base is extremely durable, scratch resistant, flexible, slight stretch & does not deteriorate in sun or below freezing. Compounded for excellent adhesion to plastic & most surfaces. Water based for ease of use, plus no strong fumes (like solvent based paints/glues); when cured water resistant. Quick drying to touch in 2+ hours – cure in 72+ hrs. Superior adherence to plastic and most surfaces. When brushed on, use apx 20% more glue than flock (flock volume is greater than glue sold by weight.). Safety; not for ingestion and apply in a room with some ventilation. Available in 4, 8, 16, 20 oz, Qt & Gal. Easy process: clean/dry, check adhesion, seal if needed, gently rough surface, brush on glue, puff on fibers with shake bottle, do the next section/item, and then quickly double check previous one. Can spray on. Store at household room temperature or apx 70 degrees. Do not freeze or dilute more than 5% per weight. **Colors:** Clear 200; black 201; Green 202; White 203; Off-White 204; Beige 205; Brown Clay 206; Brown Mud 207; Brown Dark 208; Gray Light 209; gray med 210; and Gray Dark 211.
